

In the Drawings

The drawings were objected to for failing to include the reference sign "A." A substitute Fig. 1 is submitted herewith as ATTACHMENT A that includes the reference sign "A." This addition does not constitute new matter in that the dimension "A" was well described in the specification. Furthermore, Fig. 1, from which the reference sign "A" was missing is a figure showing prior art. The drawings were also objected to for failing to include the reference sign "68." All mention of "68" has been changed to a member of the set including 68A-D. "68" previously indicated gas containers. 68A-D are all gas containers of the type previously indicated more generally by only "68." Therefore, the changes to add "A-D" to "68" are not believed to introduce new matter.
